

Out of over 13,000 innovators from over 90 countries, Electron secures a place in the 2019 Global Cleantech 100

London, 29th January 2019

Electron, an energy tech company focused on building shared, decentralised digital infrastructure for energy, was named by Cleantech Group in the prestigious 2019 Global Cleantech 100.

The Global Cleantech 100 is an annual guide to the leading companies and themes in sustainable innovation. It features the private, independent, for-profit companies best positioned to solve tomorrow's clean technology challenges. This year marks the 10th edition of the list.

The list combines Cleantech Group's research data with qualitative judgements from nominations and insight from a global 87-member expert panel comprised of leading investors and experts from corporations and industrials active in technology and innovation scouting. From pioneers and veterans to new entrants, the expert panel broadly represents the global cleantech community and results in a list with a powerful base of respect and support from many important players within the cleantech innovation ecosystem. The list is sponsored by Chubb.

"Our tenth edition is dominated by innovations for the future of food and mobility, and a decentralized and digitized future not only for energy, but for the industrial world more generally," said Richard Youngman, CEO, Cleantech Group. "This is a far cry from the dominance of hardware, solar and biofuels in the inaugural Global Cleantech 100 in 2009."

The complete list of 100 companies was revealed on 28 January at the 17th annual Cleantech Forum San Francisco.

About Electron:

Electron is a London-based tech company harnessing blockchain to design new platforms and services for a decarbonising, digitising, decentralising and democratising energy sector. Recognising the potential for these new technologies to transform the shared virtual infrastructure of the grid, Electron is taking a top down, collaborative approach to platform development and working with various key stakeholders in the energy industry.
